Palo Alto Networks and Netsecurity

Managed Detection and Response (MDR)

Benefits of the Integration

Discover, remediate, and mitigate attacks early to reduce risk across network, endpoint, and cloud assets. Take advantage of:

- Proactive cybersecurity services that adapt to a constantly changing threat landscape with a multilayered Zero Trust approach
- Machine-speed analysis and response
- Automation combined with human analytics
- 24/7 threat detection with incident investigation and response

The Challenge

The threat landscape is constantly and swiftly changing. Attackers are getting more sophisticated, outsmarting their victims as organizations move quickly into the digital world with limited security resources. The rapid shift to hybrid cloud solutions and outsourcing leaves these organizations with less control over what security controls they have in place. Compounding the problem, there is an increasing gap between attackers' capabilities, speed, and agility compared with organizations' ability to secure their business with traditional security technology and operational best practices.

Netsecurity Secure Operations MDR

Netsecurity Secure Operations MDR is part of a complete service offering addressing the increasing gap between the threat landscape and the need for rapid adaptation to changing business needs without increased cyber risk.

Netsecurity Secure Operations offers a robust set of advanced security operations capabilities, powered by Cortex XDR:

- 24/7 threat detection
- Machine-speed analysis, investigation, and response to threats
- Multilayer prevention across network, endpoint, and cloud assets, built on fundamental principles of Zero Trust
- Transparent technical and "management level" reporting on cyberthreats affecting the organization's environment

Palo Alto Networks and Netsecurity Secure Operations

Palo Alto Networks and Netsecurity have partnered since 2009, delivering best-in-class security outcomes to customers throughout the Norwegian region. Blending Palo Alto Networks technology with Netsecurity's security service expertise, organizations can strengthen their security maturity with services like Netsecurity's Secure Operations MDR.

Netsecurity Secure Operations MDR is a managed security operations center (SOC) offering built on Cortex XDR™ and Cortex™ XSOAR for automated and AI-based detection, investigation, and response. The service relieves organizations from the day-to-day burden of security operations and achieves 24/7, year-round coverage, with service-level agreements (SLAs) based on mean time to detect (MTTD) and mean time to respond (MTTR) of less than 60 minutes.

Netsecurity Secure Operations

Netsecurity Secure Operations is addressing the challenges of a fast-evolving threat landscape and organizations lacking the ability to keep up with attackers.

By bridging the gap between customers' business needs, cybersecurity requirements, and actual capabilities, Netsecurity managed services help enterprises of all sizes, complexity, and maturity levels.

The aim is to adapt to any customer needs with a flexible and future-proofed services approach.

Vulnerability Scanning & Management	Intrusion Detection	Endpoint Monitoring	SaaS Monitoring via APIs
Custom Application Monitoring	Log Analysis (SIEM)	File Integrity Monitoring	Cloud Monitoring (O365, Azure, AWS, Google)
Dark Web Monitoring	SCADA/ICS Anomaly Detection	Threat Intelligence	Threat Hunting
Incident Response	Forensics	Reporting	Orchestration and Automation

About Netsecurity

Netsecurity is a Norwegian owned company delivering services from Norway, focused and specialised within Cybersecurity. The Cybersecurity market is constantly evolving, with new challenges impacting enterprises and organisations. Insight and intelligence are at the core of every top-class security operation. Netsecurity's holistic security approach is built around our world class Secure Operations. We have developed a market leading cybersecurity operation, by investing in breakthrough innovation and best-of-breed-technology. Our customers have access to an agile security organisation that embeds security into every aspect of their operations, aligning it with each customers specific business needs. In building resilience from the core, our customers businesses can operate and grow confidently even in today's rapidly evolving threat landscape. Find out more at www.netsecurity.no.

About Palo Alto Networks

Palo Alto Networks, the global cybersecurity leader, is shaping the cloud-centric future with technology that is transforming the way people and organizations operate. Our mission is to be the cybersecurity partner of choice, protecting our digital way of life. We help address the world's greatest security challenges with continuous innovation that seizes the latest breakthroughs in artificial intelligence, analytics, automation, and orchestration. By delivering an integrated platform and empowering a growing ecosystem of partners, we are at the forefront of protecting tens of thousands of organizations across clouds, networks, and mobile devices. Our vision is a world where each day is safer and more secure than the one before. For more information, visit www.paloaltonetworks.com.
